

Notes for the submission of your photo

As stated in the competition prospectus, the competition needs a photo of the applicant with a file size of at least 500kB, preferably 1mB or greater. Ideally, it will have a resolution of 300dpi or greater. This is especially important if the photo includes more than head and shoulder, as only a small section will be printed.

This is to ensure that the photo will print correctly in the programme; a photo that looks good on screen will not necessarily print well in the programme. You can discover the file size of a photo on a laptop or desktop in the following ways:

1. Apple Mac, command-i on the selected file's icon. This will give you all the information.
2. Windows, right-click on the file's icon and select size - this will show the file size.

Your photo should be full-face (looking straight at the camera) showing head and shoulders. The printed photos are relatively small so it's best not to have a full length photo as only a short selection will be used.

Ongar Music Club will assume that any photograph submitted in support of an entry to the Essex Young Musician of the Year competition has the photographer's consent for its publication. It will further assume that permission is granted by photographers, entrants and parents/guardians (for under-18 applicants) for the use of photographs in all publicity material relating to the competition.
